In 1867 HAYDEN'S VIRBURNUM COMPOUND was first introduced, and for fifty years it has enjoyed an ever-increasing demand, due to the confidence accorded it by the medical profession for its therapeutic dependability in Gynecological and Obstetrical conditions.

It gains and retains confidence by the results it manifests therapeutically, the only convincing test of the value of a medicinal remedy and upon this basis we invite your consideration.

Accord Hayden's Viburnum Compound a trial in your next Dysmenorrheal patient, and *you will be convinced*. Dose: One or two teaspoonfuls three times a day or as required. Administer in three or six teaspoonfuls of hot water.

A supply of the genuine H. V. C., with literature, will be sent you on request.

D. APPLETON & COMPANY NEW YORK

Preface to the Third Edition

This third edition might well be called a "special" or *military* edition, for it has been prepared to meet the needs of the present emergency. It contains a discussion of the Duties and Organization of the Sanitary Corps, the Examination of Recruits, Diseases of the Soldier, Sanitation of Troops in Camp and on the March, Sanitation of Barracks and Trenches, Physical Training, Personal Hygiene and Equipment of the Soldier, Red Cross, Rations, etc.

In one sense, this entire volume may be regarded as dealing with Military Hygiene, for the fundamental questions concerning food, water, soil, ventilation, vital statistics, disposal of wastes, disinfection, and the prevention of the communicable diseases are essentially the same for the soldier and the civilian.

The "new" diseases and new medical conditions which have arisen in the present world war, such as Trench Fever, Trench Foot, War Nephritis, Shell Shock, Gas Poisoning, Tuberculosis, Venereal Diseases, etc., are discussed.

Important Announcement

American Atlas of STEREOROENTGENOLOGY

Edited and Published Under the Sole Auspices of The New York Roentgen Society

EDITORS: Leopold Jaches, M.D.; H. O. Imboden, M.D.; William H. Stewart, M.D.

With associates and correspondents throughout the world

The American Atlas of Stereoroentgenology has already been accorded a position among the foremost and most important clinical publications of the age. The publication of this work is only made possible through the generous co-operation of the members of the New York Roentgen Society in placing in the hands of the editors their records and priceless collection of stereoroentgenograms. The Atlas will appear quarterly as a loose-leaf Journal, each issue being beautifully illustrated with from eight to fourteen stereoroent. enograms.

The X-Ray Examination of the Alimentary Tract

By JAMES T. CASE, M.D., F.A.C.S., Battle Creek, Mich., and Chicago, Ill.

Four of such sections, devoted entirely to the "X-Ray Examination of the Alimentary Tract," are now completed

These photo Stereoroentgenograms are marvels of realism, and many of them have been admired throughout this country and Europe.

X-Ray Examination of the Chest for Pulmonary Tuberculosis

By KENNON DUNHAM, M.D., Cincinnati, Ohio

This section is illustrated by forty-two Photographic Stereoroentgenograms reproducing the various tubercular conditions of the chest

The doctor has proven the cause of the tree-like shadow seen upon a normal chest plate to be due to blood vessels, bronchi and connective tissue, and not due to either alone. He has described the normal chest plate, and shown that characteristic variations occur in tuberculosis. This reading has been verified by over two thousand carefully examined cases.

Localization of Foreign Bodies by Means of Stereoscopic Roentgenograms and Methods of Their Removal

By EMIL G. BECK, M.D., F.A.C.S., Chicago, Ill.

Two sections to be illustrated by about Sixty Photographic Stereoroentgenograms

First of all, Dr. Emil G. Beck will point out the advantage of stereoscopic radiography over the single picture, and illustrate with one striking example the difficulty of interpreting properly single pictures. Then he will show by illustrative examples the method of localization of foreign bodies in the head, chest, abdomen, stones in the kidney and bladder, and foreign bodies in the extremities. At the same time he will outline the proper surgical procedure in each case, so that this work will not be simply an atlas of stereoscopic radiographs of foreign bodies, but practical instructions as to how to deal with them after they are localized. In other words, it will not be a work by the radiographer, but radiography as applied in the surgical treatment in the removal of foreign bodies.

Sold only by subscription. For further particulars, address

Results To-day

with the employment of

ANEDEMIN ^{In} Stubborn DROPSIES

As a means of emptying the tissues of accumulated fluids in dropsical conditions ANEDEMINE has gained wide vogue among practitioners. In cardio-renal disease ANEDEMINE acts by steadying the heart, adding to its propulsive force, and increasing the renal function through its diuretic effect. This double influence of ANEDEMINE makes it an agent of pronounced worth in all dropsical states, in which it is the therapeutic agent of first choice with many able practitioners. ANEDEMINE is a well balanced preparation, and he who employs it may know that he is using a well tried combination of drugs in dropsical effusions.

ANEDEMINE is with druggists—in tablet form, chocolate coated and packed in sealed tins of 100's—costing the dispensing physician and hospital special price or by our Canadian Agent, The Lyman Bros Co., Toronto, Can., or other Canadian jobbers.

Advertised to the medical profession exclusively. Samples with literature and clinical data sent physicians on request.

To test Anedemin, Doctor, would convince you of its extreme power in dropsies and its real worth for the cause—it strikes at the very root of the trouble and removes the cause of anasarca, rather than its results.

- MONTREAL

LAKEVIEW SANITARIUM

Burlington, Vt., 3 hours from Montreal

Frederic W. Sears, M.D., Resident Medical Director.

E. O. Crossman, M.D., Supt.

The grounds are extensive and beautiful. About twenty-three acres, with pasture, park, grove and gardens, together with lake shore, make up the estate. There is a private Holstein dairy, vegetable garden, and poultry house. Real farming is practiced, both for supplying the table and as diversion for patients. Pleasant, lengthy walks under the trees and through the grounds, the study of nature, and agrarian activities, afford rest, exercise, or occupation.

The Lakeview Sanitarium receives for treatment all nervous and mild mental cases and those of chronic invalidism. Drug habits and some alcoholics are admitted, but only those who have satisfactory references.

A new and complete hydrotherapeutic outfit has recently been added making the institution, in equipment, equal to that of any in the country.

Consultation with specialists at University of Vermont Medical College always available.

Address, DR. EDGAR O. CROSSMAN, BURLINGTON, VT.

Long Experience and Modern Facilities

For Curing Without Pain the Drug and Drink Habit

Our tried and certain method of treatment will in a brief time remove the toxicants from the system and obliterate the craving, without suffering, loss of consciousness or impairment of the mental or physical forces.

Private Rooms—no wards, and a limited number of patients insures desired privacy.

Individual Treatment by two physicians and nurses specialized in the work secures the best possible results.

A Fixed Charge for definite results is made when patient is admitted; this covers everything necessary to end of treatment.

There is no secrecy about our method of treatment. THE JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION published it in detail Feb'y. 18, 1911. It will also be found in OSLER & McCRAE'S MODERN MEDICINE, 1914. After careful observation of 22 drug cases treated at this hospital, Dr. Richard C. Cabot said in the BOSTON MEDICAL AND SURGICAL JOURNAL, May 11, 1911—

The treatment has great value, especially in the cure of the morphine habit. We bespeak

the co-operation of all physicians having alcoholic or drug addicted patients who require special treatment

Consulting Physicians—Richard C. Cabot, M.D., Boston, Mass.; Frank G. Wheatly, M.D., North Abington, Mass.; Leonard Huntress, M.D., Lowell, Mass.; William Otis Faxon, M.D., Stoughton, Mass.; Rufus W. Sprague, M.D., Boston, Mass.; are referred to as evidence of the reliability of this hospital.

Convenient to the center of Boston—10 minutes by electric via Beacon Street to St. Paul Street; first street to left, second house around corner to left. Delightful surroundings, devoid of hospital environments.

Telephone Brookline 3620. When in haste use telephone or telegraph at our expense.

THE-FISK HOSPITAL, 106 Sewall Avenue, CHARLES D. B. FISK, Superintendent, BROOKLINE, MASS.

ESTABLISHED 1901

The CHARLES B. TOWNS HOSPITAL for DRUG and ALCOHOLIC ADDICTIONS

refers by special permission to many practitioners in a number of States who have professional knowledge of what the Hospital accomplishes for its patients.

These practitioners have either brought patients here and followed every detail of treatment and care in their professional capacity, or, they have observed the medical and sanative results of the Hospital's treatment in patients referred back to them upon conclusion of the Hospital treatment.

Thus they are in a position to speak from actual professional experience not only of the medical results obtained by the treatment, but of the Hospital's service to its patients and of its personal and professional dealings with the practitioner.

The Hospital is highly pleased to be permitted to refer the *professional* inquirer to fellow practitioners in his own State or vicinity, of whom inquiry may be made direct as to the results that may be expected to follow the definite medical treatment for habit and addiction and the scientific recuperative after-care as administered and carried out in this institution.
